DESCRIPTION

A special actinic lamp attracts flying insects. An ingenious system of turbo-suction, with an axial radial profile suction fan, that draws insects into an extractable box from which they cannot escape.

FOR USE IN

- Kitchens, food preparation and waste areas for the control of flies.
- Patios on summer evenings for the control of mosquitoes.
- Farmyards and stables and anywhere flies are a nuisance.

ELIMINATES

- Unpleasant smells.
- Harmful poisons, chemicals or toxins.
- Incrustation on high-voltage grids.

INSTALLATION

- Apparatus can be fixed to a wall or left free standing.
- Protect from direct rain.

TECHNICAL DATA

- Dimensions 225mm x 293mm x 152mm
- Weight 2.2kg
- Power supply 220v 40w fan
- Consumption 1.5kw in a 24hr cycle, equates to aprox R3 per 24hrs

REPLACEMENT BULBS

Also available from DinnerMates

FLY CATCHER OBSERVATIONS

- A full 24 hour cycle in an area with high fly activity, showed that more than 350 flies were trapped.
- During the night with high mosquito activity 30 - 40 mosquitoes were trapped, including moths.
- Enhances the food experience by minimising flying insects.
- Avoids dead flies lying around from high voltage grids.

SUGGESTED CLEANING

- Once in a 24 hour cycle. This enables one to monitor activity in numbers for record purposes and check on validated hygiene management.
